

**Installation Instructions for TH65SR**  
**Toyota Hilux RN/LN 65 Single Cab**  
**130L Replacement Tank**

1. Remove the rear section of the drive shaft taking care to mark splines for later refitting. Loosen rear section of the exhaust system. Drain and remove the original tank.
2. Remove the fuel sender unit and fuel pick up from original tank and position sender unit into the new tank. Adjust float arm length to ensure accurate fuel gauge. Fit the sender unit to tank using OEM screws. Fit fuel pick up unit to tank using OEM screws. Screw brass fittings into tank and attach hoses to respective fittings as per diagram.
3. The driver's side front shackle may need to be cut to length of shackle bolt nut.
4. Lift tank into position and bolt in place using new bolts provided. Connect all lines and sender unit wires.
5. Refit the drive shaft and tighten the exhaust system.
6. Fill with fuel and check all hoses and fittings for leaks.
